

Abstract: University Affiliation Management System

The **University Affiliation Management System** is a web-based application designed to streamline and digitize the process of college affiliation with a university. It enables effective management of new course affiliation requests, renewal applications, and appraisal-based verification through a secure, role-based platform. The system facilitates interaction between colleges, appraisers, and administrators, reducing paperwork, enhancing transparency, and improving decision-making efficiency in the affiliation process.

Brief Explanation:

The system includes the following key components:

- **College Portal:** Colleges can register, log in, and submit new or renewal affiliation requests for various courses. They can also track the status of their applications
- **Admin Panel:** The university admin manages all incoming requests, assigns appraisers, and makes final decisions on approval or rejection based on the appraisal reports.
- **Appraisal Role:** Appraisers are assigned by the admin to verify submitted applications through document review and college visits. They update the application with verified details and recommend approval or rejection.
- **Features:**
 - Role-based access control (Admin, College, Appraiser)
 - Application tracking and status updates
 - Document upload and verification system
 - Notifications for assignments, approvals, or rejections
